

Lenzify — Production Testing Checklist

Step-by-Step Verification Guide for Admin Panel, Storefront, Mobile Experience & Database

SECTION A: ADMIN PANEL VERIFICATION

☐ Step 1: Admin Dashboard & Network Health

URL: <http://localhost:8000/admin/dashboard>

Action:

- Open terminal and browser developer console (F12).
- Navigate to the admin dashboard and reload the page.

Expected / What to Verify:

- ' KPI cards (Total Sales, Total Orders, Total Customers, Low Stock, Abandoned Carts)
- ' Zero console errors: 'TypeError: fetch failed' and empty '{}' errors are completely gone.

☐ Step 2: Prescription Lenses Management

URL: <http://localhost:8000/admin/lenses>

Action:

- Navigate to /admin/lenses from the sidebar menu.
- Inspect the page title, sidebar label, and listed items.

Expected / What to Verify:

- ' Sidebar link is named 'Prescription Lenses' (clarified from generic optical).
- ' Page title reads 'Prescription Lenses (for Frames)'.
- ' All lenses (Single Vision, Bifocal, Blue Cut, Photochromic) display with Active status.

☐ Step 3: Edit Lens, Schema Cache & Power Tiers

URL: [http://localhost:8000/admin/lenses/\[id\]/edit](http://localhost:8000/admin/lenses/[id]/edit)

Action:

- Click 'Edit' on any active lens (e.g., Blue Cut or Photochromic).
- Change the price (e.g. 11,299) and modify features.
- In 'Power Range Pricing' table, click 'Load Standard Presets' or add custom row (-4.00 to -10.00).
- Click 'Save Changes'.

Expected / What to Verify:

- ' Lens updates cleanly with green success notification toast.
- ' NO 'Could not find sub_category column' schema error.
- ' Power range tiers are saved successfully.

☐ Step 4: Soft Deactivate Lens

URL: [http://localhost:8000/admin/lenses/\[id\]/edit](http://localhost:8000/admin/lenses/[id]/edit)

Action:

- On any lens edit screen, click the red 'Deactivate Lens' button and confirm.

Expected / What to Verify:

- ' Lens is marked inactive without breaking foreign keys or existing customer order history.

☐ Step 5: Contact Lenses (Standalone Products)

URL: <http://localhost:8000/admin/products/new>

Action:

- Navigate to 'Add Product' (/admin/products/new).
- Click the 'Product Type' dropdown.

Expected / What to Verify:

- ' Option displays 'Contact Lenses' (product type 'contact-lens') instead of ambiguous 'New Product'.

☐ Step 6: Customer Directory & Profiles

URL: <http://localhost:8000/admin/customers>

Action:

- Navigate to /admin/customers from the sidebar.

Expected / What to Verify:

- ' Customers table loads registered user profiles cleanly without RLS errors.

SECTION B: STOREFRONT & MOBILE CUSTOMER JOURNEY

□ Step 7: Mobile Touch & Guest Add to Cart

URL: <http://localhost:8000/>

Action:

- Open Chrome DevTools (F12) and toggle Device Toolbar (Ctrl+Shift+M) to simulate mobile view.
- Open an unauthenticated Incognito window.
- Browse catalog cards on mobile, then click into a frame product.
- Click 'Add to Cart' (Frame only).

Expected / What to Verify:

- ' Quick Add and Wishlist buttons on cards are directly visible without requiring mouse
- ' Guest is NOT redirected to /auth/login. Item adds directly to persistent cart.
- ' Header cart badge updates immediately with item count.

□ Step 8: Prescription Lens Customization & Surcharge

URL: [http://localhost:8000/product/\[id\]](http://localhost:8000/product/[id])

Action:

- On a frame product page, click 'Select Lenses'.
- Choose a lens type (e.g. Blue Cut) and proceed to prescription step.
- Enter high power values: Right Eye (OD) SPH: -5.00, Left Eye (OS) SPH: -2.00.
- Review the pricing summary step, then click 'Add to Cart'.

Expected / What to Verify:

- ' Prescription step displays dynamic surcharge badge (e.g. '+1500 High Power Adjustm
- ' Summary step itemizes: Frame Price + Base Lens Price + Power Surcharge = Total P
- ' Cart stores customized power values and adjusted pricing accurately.

□ Step 9: Cart Page & Image Audit

URL: <http://localhost:8000/cart>

Action:

- Navigate to /cart while remaining in guest mode.
- Inspect product images, prices, and refresh the browser page.

Expected / What to Verify:

- ' Both products (frame-only and prescription-customized) display with proper primary i
- ' No gray placeholder boxes appear.
- ' Refreshing the page DOES NOT wipe the guest cart.

□ Step 10: Login & Seamless Cart Sync

URL: <http://localhost:8000/auth/login>

Action:

- Click 'Proceed to Checkout' or log in with an existing user account.

Expected / What to Verify:

- ' Guest cart items automatically migrate into the user's database cart session upon lo

SECTION C: DATABASE ONE-TIME MIGRATION

□ Step 11: Supabase SQL Migra [URL: https://supabase.com/dashboard/project/ehrtbfbadqhgfruseidf/sql](https://supabase.com/dashboard/project/ehrtbfbadqhgfruseidf/sql)

Action:

- Open Supabase Dashboard -> SQL Editor.
- Run: ALTER TABLE lenses ADD COLUMN IF NOT EXISTS power_ranges jsonb DEFAULT '[]::jsonb';
- Run: NOTIFY pgst, 'reload schema';

Expected / What to Verify:

- ' Query executes successfully (Success. No rows returned).
- ' PostgreSQL schema is refreshed and power ranges persist permanently.
